INSTRUCTIONS FOR OPERATING THE DUAL SCREEN DISPLAY

- For Microsoft Flight Simulation using the dual screen display...
 1. Determine how your screens flow in to each other by dragging the mouse to the top, bottom, left and right. Note which direction allows the cursor to overlap on to the second screen. (You will need to remember the appropriate direction for future steps)
 2. Locate and open the icon labeled “**Microsoft Flight Simulator**”, on your Desktop.
 3. Once the program is running **AND** you have selected the desired “Mission” or “Free Flight” Right Click the mouse anywhere on the screen and select “**Cockpit View**”.
 4. Place the cursor on the instrument panel in the Cockpit View. While pressing and holding the left button of the mouse, drag the panel toward the direction determined in Step #1.
 5. Maximize each screen by placing the cursor on the corners and edges of the images, left click the mouse and slide the edges to the borders of each screen.
 6. Note: Each screen function will work on both screens; however, the cursor has to be on the screen you wish to command.

If you are having a problem, please call us before it becomes a frustrating. We can be reached during normal business hours at 860-582-5031 X-0 and Heather will help.
